### HARDWARE & INSTALLATION:

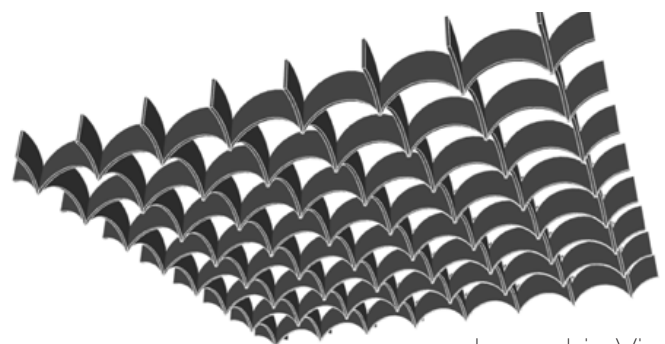

Cloud grid systems are suspended using aircraft cable from pre-drilled holes on specific panels—typically 48in spacing on center no further than 24in from edge of system. Each cloud system includes 5ft of cable and Grippler (4ea). Due to varying ceiling layouts and substrates, contractor is required to supply ceiling mounting hardware. Specific hardware is available upon request.

**WARRANTY:** 4-year warranty against workmanship and manufacturing defects
